

## BD10 PURLIN CLIP

### Product Description

Steel one piece 'P' shaped purlin clips with holes to suit M10 threaded rod in a bright zinc plated finish.

### Applications

Designed for use with M10 threaded rod to suspend building services from the bottom flange of a wide range of purlin sections. BD10 should be used for supporting static loads only.

### Installation

1. Place purlin clip over the return lip of the purlin flange
2. Install M10 rod with nuts above and below the clip
3. Clips should be positioned with the threaded rod up against the purlin
4. Tighten the nuts to compress the clip and clamp the purlin
5. Purlin clips should not be overtightened – maximum recommended tightening torque 5Nm

### Technical Data

CODE	MF CODE	HOLE Ø	MAX FLANGE	*SAFE LOAD
BD10	1469310	11	25mm upstand	0.2kN

\*This load is subject to the maximum allowable point load for the purlin for which the purlin manufacturer should be consulted
